

## ***Clinical Utilization Management Guidelines***

Attached is a list of the *Clinical Utilization Management (UM) Guidelines* Amerigroup has adopted.

The full list of *Medical Policies* and *Clinical UM Guidelines* are publicly available on the ***Medical Policy and Clinical UM Guideline subsidiary website***. Their purpose is to help you provide quality care by reducing inappropriate use of medical resources.

MCG Care Guidelines or InterQual<sup>®</sup> Level of Care Criteria (based on specific provider contracts) are used for:

- Medical necessity review for medical and behavioral health inpatient review.
- Inpatient site of service appropriateness.
- Inpatient rehabilitation and skilled nursing facility review.
- Outpatient based service or procedure where there is not an established *Medical Policy* or *Clinical UM Guideline*.

In addition, for behavioral health services, the American Society for Addiction Medicine<sup>®</sup> (ASAM) Patient Placement Criteria is utilized for substance use disorder treatment authorizations, with the exception of detoxification which uses MCG Care Guidelines.

Medicaid state contracts, regulatory guidance, CMS requirements and our *Medical Policy/Clinical UM Guidelines* supersede MCG Care Guidelines and InterQual Criteria.

**Note:** We make determinations of medical necessity on a case-by-case basis in accordance with the definition of medical necessity that is contained within the Medicaid state contract, regulatory guidance, CMS requirements or in our *Medical Necessity Criteria Policy ADMIN.0004*.

If the request doesn't meet established criteria guidelines, it will be referred to a licensed physician reviewer with the appropriate clinical expertise to make a decision.

## Clinical Utilization Management Guidelines

The *Clinical Utilization Management Guidelines (CUMG)* below, that are indicated as *new*, were adopted by the Medical Operations Committee for Amerigroup members on March 23, 2023.
